LOCAL ENVIRONMENTAL PROTECTION PROGRAM STATE FISCAL YEAR 2004 ANNUAL REPORT

Overview

The Kansas Department of Health and Environment (KDHE) administers an environmental grant program to local entities for development of a local environmental protection plan to implement the environmental protection strategy of the Kansas Water Plan. An environmental protection plan covers the sanitary code (onsite wastewater code and non-public drinking water well code), subdivision water and wastewater, solid waste management, hazardous waste management, public water supply protection, and nonpoint source pollution control.

Through this grant program, financial and technical assistance is provided to counties to assist in establishing and operating programs for environmental and public health protection. This is accomplished by both the prevention of environmental pollution and the abatement of existing sources of pollution.

KDHE has three Watershed Field Coordinators who have the responsibility to coordinate and administer the Local Environmental Protection Program (LEPP) grants and work with the county LEPP staff.

Beth Rowlands

Richard Basore

Doug Schneweis

The map on page 11 shows the Watershed Field Coordinators coverage area.

Funding

Financial assistance from the Kansas Water Plan fund totaling 1.6 million dollars was allocated to the program during State Fiscal Year 2004 (SFY 2004) for funding of base programs. Figure 1 shows the funding history for the program.

LOCAL ENVIRONMENTAL PROTECTION PROGRAM STATE FISCAL YEAR 2004 ANNUAL REPORT

Figure 1
Local Environmental Protection Program
Funding History

During SFY 2004, 100 counties received base grants with a minimum of \$7,000 and a maximum of \$125,000. There were 38 single county programs and 10 multi-county programs. There were five counties that didn't participate in the LEPP. They were Chase, Chautauqua, Comanche, Haskell and Linn.

Funds remaining after base grants are satisfied are available as target grants and can be used to perform specific projects or to supplement base grant funds to purchase equipment and supplies. During SFY 2004, target grants totaling \$202,119 were made to 20 LEPPs.

Table 1 on page 12 summarizes the base grants and target grants for each program.

Target grants were awarded to programs interested in attending the Kansas Environmental Leadership Program (KELP). The recipients were: Morton County LEPP, Southwest Kansas LEPP, Northeast KS Environmental Services, Coffey County Health Department, Lyon County Health Department, South Central LEPP, and Reno County Health Department. KELP is a cooperative project of K-State Research & Extension and KDHE. KELP is a new approach to community leadership training that offers an exciting combination of activities about leadership studies and research on water quality. The result is an experience in leadership that will prepare graduates to be catalysts for water quality protection. KDHE encourages all program directors and sanitarians to enroll in this training course.

2004 KERP Class

Sanitary/Environmental Codes

LEPP regulations (K.A.R. 28-66-1(b)(2)) state that a core program will include “the development, implementation, and enforcement of a sanitary/environmental code which has been approved by the secretary of KDHE and which establishes standards for the management of onsite wastewater systems for the treatment and disposal of domestic sewage only.”

During SFY 2004, four counties made revisions to their sanitary/environmental code.

- Cloud County made changes to the sections in their code dealing with plan approval for private wastewater systems and the minimum standards for soil topography and geology. The revised code was adopted in March 2004.
- Ford County included a chapter in their code that would address the land application of paunch. The revised code was adopted in July 2004.
- Miami County made changes to the Policy, Administration and Enforcement Chapter and Sewage Disposal Chapter in their code. The revised code was adopted in May 2004.

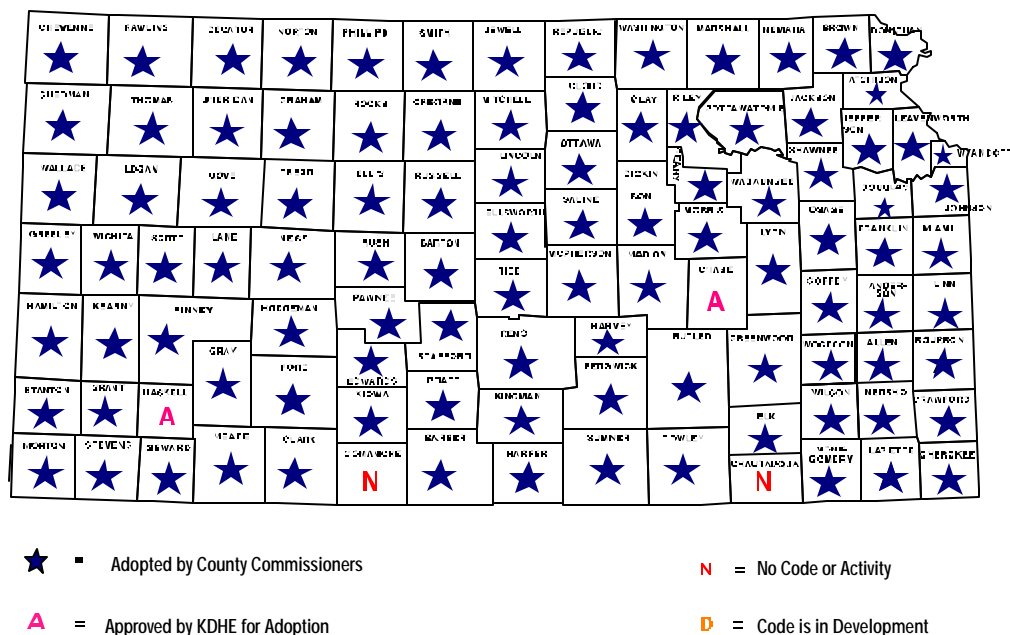

<p align="center">LOCAL ENVIRONMENTAL PROTECTION PROGRAM STATE FISCAL YEAR 2004 ANNUAL REPORT</p>
--

- Mitchell County made changes to the chapters in their code dealing with On-site Wastewater Management and Nonpublic Water Supplies. The revised code was adopted in December 2003.

Figure 2 shows the current status of code activity in the state by county.

Figure 2

ENVIRONMENTAL CODE STATUS

New Requirements/Program Tracking

KDHE – Watershed Management Section has developed a WEB based application and reporting system called the Kansas Clean Waters (KCW). The KCW automates the LEPP application process and quarterly reporting process. All reporting must now be done via the KCW. The KCW can be accessed at <http://kcw.kdhe.state.ks.us/> . Figure 3 shows the login screen for the KCW.

State Water Plan Priorities

The Water Quality Policy Section of the SFY2005 Kansas Water Plan recognizes the value of the Local Environmental Protection Program as a means of implementing the policies of the Plan. SFY 2005 LEP Plans are required to identify activities and tasks the LEP Program will execute to contribute towards attainment of these 2010 Objectives in the Kansas Water Plan:

- *By 2010, reduce the average concentration of bacteria, biochemical oxygen demand, dissolved solids, metals, nutrients, pesticides and sediment that adversely affect the water quality of Kansas lakes and streams.*
- *By 2010, reduce the average concentration of dissolved solids, metals, nitrates, pesticides and volatile organic chemicals that adversely affect the water quality of Kansas groundwater.*
- *By 2010, ensure that water quality conditions are maintained at a level equal to or better than year 2000 conditions.*

In the fall of 2003, the Kansas Water Authority made significant changes to how the Kansas Water Plan is developed and written. The major change relevant to LEP Programs is that TMDLs (total maximum daily loads) and public water supply protection are no longer listed as specific priorities, but have been integrated into the “protect and restore watersheds” priority.

The Kansas Water Plan has three top statewide priorities:

- To protect and restore watersheds and water quality.
 - All LEP Programs must address this priority in their SFY 2005 LEP Plan.
- To conserve and extend the life of the Ogallala Aquifer.
 - If the Ogallala Aquifer is an issue in the LEP Program area, this priority must be addressed in the LEPP’s SFY 2005 LEP Plan.
- To develop regional water supply strategies throughout Kansas.
 - If there is a regional public water supply issue in the LEP Program area, this priority must be addressed in the LEPP’s SFY 2005 LEP Plan.

Some of the Basin Advisory Committees have also determined that other priority issues are important to their basin. All basin priority issues are listed in Table 3 (next page). LEP Programs must be aware of these and be available to provide assistance.

Local Environmental Protection Program Goals SFY 2005

- Implement Local Environmental Protection Plans.
- Establish a Local Environmental Protection Committee.
- Develop, implement and enforce an environmental code for onsite wastewater treatment.
- Develop, implement and enforce code for private drinking water wells and supplies.
- Provide local environmental information, education, and technical assistance.
- Participate in local subdivision water and wastewater programs.
- Promote proper solid and hazardous waste management.

**LOCAL ENVIRONMENTAL PROTECTION PROGRAM
STATE FISCAL YEAR 2004 ANNUAL REPORT**

- Participate in local nonpoint source pollution control programs.
- Promote water supply protection.
- Participate in the establishment and implementation of TMDLs.
- Where TMDLs have been established, address the impairments.
